Summary

Full-stack developer with 4 years of experience in building web applications using React, Node.js, and Python. Strong background in agile development and cross-functional collaboration.

Experience

Amazon - Software Development Engineer II

2022 - Present

- Developed and maintained customer-facing features for Amazon Prime Video using React and TypeScript
- Built RESTful APIs with Node.js serving 5M+ daily active users
- Implemented A/B testing framework that increased conversion rate by 12%
- Led migration from monolithic architecture to microservices using AWS Lambda

Atlassian - Software Engineer

2020 - 2022

- Built collaborative features for Confluence using React and GraphQL
- Developed Python-based data pipeline for user analytics processing 10TB+ daily
- Improved page load performance by 35% through code splitting and lazy loading
- Participated in on-call rotation, maintaining 99.9% service availability

Education

University of Washington - B.S. Computer Science

2016 - 2020

- GPA: 3.7/4.0, Dean's List

Skills

Languages: TypeScript, JavaScript, Python, Java, SQL

Frontend: React, Next.js, Vue.js, TailwindCSS, HTML/CSS

Backend: Node.js, Express, Django, FastAPI, GraphQL

Cloud: AWS (Lambda, DynamoDB, S3, CloudFront), Docker

Tools: Git, GitHub Actions, Jest, Cypress, Figma

Projects

AI Code Review Bot (Open Source)

- Built a GitHub App using OpenAI GPT-4 API to automatically review pull requests
- Implemented in TypeScript with 95% test coverage, 500+ GitHub stars
- Integrated with Slack for real-time notifications
